# MIEBAKA IWARRI

Fullstack Engineer
Lagos, Nigeria | miebakaiwarri@gmail.com | +234 803 422 4184
https://imiebaka.github.io | https://linkedin.com/in/miebakaiwarri

## PROFESSIONAL EXPERIENCE

**Skillup Africa**                                                                    Aug 2022 - till date
Software Development Instructor
Trained software developers on Algorithm and Data Structure, version control with Git and GitHub, React, Express and version control with Git and GitHub MongoDB.

**Uobis - Remote**                                                                    Jan 2022 - till date
Fullstack Engineer
- Develop Web apps using Python and Typescript
- Develop Mobile Applications with React-Native
- DevOps activity managing Docker container
- Manage Linux server

**Adimsira Software Solutions**                                              Jan. 2018 to June 2018
Junior Software Developer

## PROJECTS:

**Optiquiz (https://optiquiz.onrender.com)**
A quiz platform for Optometry students in the UK,  to prepare them for examination success
- Stripe Payment system implemented
- The frontend was built with the React library
- The backend was built with the Express framework

**Lajo (https://lajo.com)**
A platform for micro contribution and micro pension. The platform is a web app that runs on all browsers.
- Built the product Backend using flask and Frontend with Vue
- Implemented  Flutterwave to handle payment from external API.
- Docker was used to containerize the application for easy deployment.
- I used Postgres DB to enable the persistence of data and Docker to facilitate ease of deployment.

**Sabbi (https://sabbiapp.com)**

A platform that helps people locates business near them. I took full responsibility of the Engineering process of this platform from the Frontend, Backend down to deployment.

- Implemented location API to get the user's current location. Full-text search was added to the platform to ensure optimal results.
- Created Bots to go to other websites to get businesses to enrich the system with more data for its users.
- The tools I used are React, Flask and Postgres DB

## EDUCATION

Adeleke University, Ede - Osun                                      Aug. 2015 to July 2019
B.Sc. Computer Science

## TECHNICAL SKILLS

Python, Typescript, Javascript, Node, Docker, Git, Vue, React, React Native, GraphQL, RestAPI, AWS-lightsail, SQL, ExpressJS, Postgres, MongoDB, Redis, MySQL, CI/CD, Flutterwave, Paystack, Stripe

## CERTIFICATIONS AND LICENSES

**Certifications and Licenses**
**New Horizons - Certified Secured Computer User (C | SCU)**     2019

**Freecodecamp - Responsive Web Design**                          2022
Responsive Web Design Certification,
Build webpages using HTML for content, and CSS for design
https://www.freecodecamp.org/certification/fcc6b4a0432-16f0-4654-b964-787d5025fdb5/responsive-web-design

**Google Cloud Fundamentals: Core Infrastructure**               2022
He learned the essential concepts and terminology for working with Google Cloud Platform (GCP). He also learned about, and compared, many of the computing and storage services available in the Google Cloud Platform, including Google App Engine, Google Compute Engine, Google Kubernetes Engine, Google Cloud Storage, Google Cloud SQL, and BigQuery. You learn about important resources and policy management tools, such as the Google Cloud Resource Manager hierarchy and Google Cloud Identity and Access Management.
